

# Ankit

## 3+ years | Full Stack Web Developer

### Summary:

- A Full Stack Developer with a focus on Full Stack development, ReactJS | Node JS.
- I have an extensive and successful background in this field with building productive, fast and well-designed projects.
- Development of websites, portals, and web applications I'm responsible for, as well as developing custom solutions that are highly customized, robust, feature-packed, and modular, and designing/implementing new features and functionalities I know how to implement.
- Work with development teams and product manager to ideate software solutions. Build the front-end of websites through appealing visual design.
- Understand the needs of your customers and be able to respond effectively with a plan of how to meet these.
- Have a good understanding of the products or services and be able to advise others about them.
- Build features and applications with a mobile response design. Help out fellow team members in the complex tasks Develop the Core and complex strategies of the projects.
- I've completed a variety of fully custom Full Stack development projects with user friendly UI design and high-end functionality. In the development of web applications, I am familiar with the design, architecture, development, and publishing processes.
- Experience in Third Party Integration such as courier APIs, Google APIs.
- Proficient in code versioning tools such as GIT.
- Logical Thinking. A keen eye for design and attention to details.

### Professional Qualifications:
